

Android Bike Rental

Mobile Software

Bike Rental User Flow

Here you can see our completed version of the app.

<https://drive.google.com/file/d/1Mylvo8CEXP2whlWXsQldFB5INXHClEKw/view?usp=sharing>

I will use it as reference below.

Design

In the app, I created the navigation bar, with the animation and text. But I couldn't link it up to change to different activities. Rayco did that.

I created the custom text fields in the Login/Registration page. When you select the field the icon will change from black to blue, also the borders of the selected field will be changed to blue as well.

Fragments

I created the initial fragments, so when we change activities, the navigation bar will stay on the bottom. But again I wasn't able to do it. Rayco finished that as well.
