Reading Guide

We used the Double Diamond method. This is our second project in this duo, so we already had an idea of how to start and afterward, split the work equally.

During our 1st Iteration, we created:

- Brainstorm session
- Persona
- Empathy map
- Sketches
- Low fidelity prototype

After we got a green light on our app idea, we went more in-depth and it was our full first double diamond pipeline.

During the 2nd iteration, we created:

- Literature study
- More brainstorming
- High fidelity prototype
- QR Code hardware for business cards

We had a lot of positive feedback from this iteration, we had to tweak some things like design and color palette, but once we fixed that we headed to our third iteration.

During our 3rd iteration we focused heavily on coding, creating the front end for the app and fixing bugs.

During the 3rd iteration, we created:

- Revisiting and updating the document
- AirDrop functionality
- Creating the app
- Fixed Bugs

Reflection:

I am happy with our project. I would say I focused more on coding than before. We also did some user research to compensate for the last project. The only problem in the way was the NFC, which we really wanted, but couldn't get.
