Bike Rental User Flow

Here you can see our completed version of the app.

<https://drive.google.com/file/d/1MyIvo8CEXP2whlWXsQldFB5INXHClEKw/view?usp=sharing>

I will use it as reference below.

QR code scanner

I created the initial QR code scanner, in which you can get the bike id and name of user.

You can see it here:

<https://www.youtube.com/watch?v=9n1pkhG0M20>

I have also uploaded the code in my Workshop Code Git:

<https://git.fhict.nl/l425731/workshop-plamen-neshev>

Map API

I also created the early version for the Map API from Google. I played with coordinates and markers. You can find it also in my GIT for Workshop Code
