2. Feedpulse

Checkpoint 15 **Wednesday** 11-05-2022   

 **Neshev, Plamen P.H.** 9 days ago
Marcel liked our progress. Small remark on the settings page to be more in style with the main map.
Erik advised we focus more on user testing and usability by creating scenarios. He liked the design and thinks it looks professional.

Checkpoint 14 **PWA Progress** 09-05-2022    

 **Haex, Rayco R.H.C.M.** 11 days ago
Marcel liked the design and the progress we got already. We got the map working which is interactive by using device orientation to determine where you're looking at.

We will continue making progress and try to have the state switching working by wednesday.

Checkpoint 13 **PWA Concept** 25-04-2022    

 **Haex, Rayco R.H.C.M.** 25 days ago
We got good feedback on our workshop projects.
Our project idea itself got greenlight. In short it's a "live map" of events that are nearby for for example nightclubs & businesses (they are categorized separately). The 2 users are companies & students.

We gonna build it as a Svelte front-end with a node.js/firebase backend.

Overall I am pretty happy with our FeedPulse. Although we got less feedback than usual, because of the holidays, I am still happy about how our project turned up.

3. Self-assessment

I am happy with our project in general. We planned it well, did our tasks and the end result speaks for itself.
