IOS StuNect

Mobile Software

Here you can see our completed version of the app

https://youtu.be/kzlAmjR1lr4

I will use it as a reference below.

1. Design

I designed the event page, with a popup event. I created the navigation bar as well with icons. I also created another version for the contact page, but we decided to not put it in the final version

2. Functionality

Before we thought of AirDrop and after we tried NFC, we were going to use QR Code instead for the business cards. I created a working QR Code Scanner with a QR Code generator. We didn't need it in the end though because we had AirDrop
